

# Raw Materials for Clinical Diagnostics

Serving the Diagnostics  
Market for Over 30 Years

Fortis Life Sciences supplies raw materials for clinical diagnostics applications. Our raw materials are suitable for a variety of diagnostic applications including clinical chemistry (nephelometry/turbidimetry, immunoelectrophoresis (IEP), immunofixation electrophoresis (IFE)) and point-of-care diagnostics (ELISA, LFA).

We offer large-scale and bulk production of these reagents, including custom formulations to meet your specific application requirements. Contact our team to discuss your specific needs.

## CUSTOM SERVICES FOR DIAGNOSTICS

### Affinity Purification Services

- Protein G
- Protein A
- Any antigen protein in our catalog, or provided by the customer

### Adsorption Services

- Custom adsorption for higher levels of specificity

### IgG Fractionation

#### Custom Antibodies

- Recombinant Monoclonal Antibodies
- Polyclonal Antibodies
- Antibody Conjugation

#### High-throughput protein separation and analysis services

## OFF-THE-SHELF DIAGNOSTIC REAGENTS

### Bulk Antisera

- Human IgM
- Human IgA
- Human IgG
- Albumin

### IgG Fractions

- Kappa and Lambda IgG Fractions

### Antibodies

- Primary Antibodies
- Affinity Purified Antibodies
- Secondary Antibodies

### Antigen Proteins

- Purified Proteins
- Colloidal Gold Conjugates
