

Simplifying Lyophilized Bead Solutions

Leveraging over 25 years of experience and a collaborative approach, we tailor lyophilized beads for your molecular and point-of-care diagnostics, enabling you to:

**Accelerate Your
Time to Market**

- Broad application expertise
- Proprietary excipients library
- Smooth technology transfers
- Rapid formulation optimization

**Adapt and
Scale with Ease**

- LBR sizes ranging from 3µL to 75µL
- Applications support including ultra-high-sensitivity, POC, CRISPR-based diagnostics, LFA
- Robust production capacity up to 20 million beads per month
- Multiple format options including cassettes, tubes, and strips

**Achieve High Quality and
Regulatory Compliance**

- ISO : 13485 (2016) certified
- 21 CFR 820 compliant
- cGMP for IVD production
- Successful customer and regulatory audits

Why Fortis?

Decades of expertise
in lyophilization

Scalability for
commercial production

Reliable partner for LBR
development

Flexibility and versatility to
streamline processes

Comprehensive services
from concept to production
